Question 1:

        0 B C

Question 2:

        2 2 3 6 4 24 5 120 6 720

Question 3:

        Prints all powers of 2 less than 1000, beginning with 1.

Question 4:

        Prints all prime numbers less than 100, beginning with 2.

Question 5:

```
        min = ra[0]
        index = 1

        while (index < 15)
                if (ra[index] < min)
                        min = ra[index]

                index = index + 1

        print min
```

Question 6:

```
        sum = 0
        index = 0

        while (index < 200)
                sum = sum + ra[index]
                index = index + 1

        avg = sum / 200

        print avg
```
